Art Unit: 3634

Inventions Group 1. claims 1-12 drawn to a rack and hook combination and Group 2. claims 13-16 drawn to a rack, hook and free standing base are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention of Group 1. can be mounted on a wall instead of on a free standing base. See MPEP § 806.05(d)

Because these inventions are distinct for the reasons given above and the search required for Group 1. is not required for Group 2., restriction for examination purposes as indicated is proper.

A telephone call was made to Applicant's Attorney on 6/14/05 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Sarah Purol whose telephone number is 571-272-6834.
